

PROCUREMENT  
IN MOTION

**Z**  
**ZOOL**  
GLOBAL

## UNUSUALLY CLEVER

It's pretty simple really. We all want an end-to-end workflow that is more intuitive, more flexible, more transparent and better value than ever before. This isn't just procurement, this is ZOOOL procurement.

In fact, procurement is all we do, and we're here to change the game:

- ▶ Easy to use and very elegant, ZOOOL centralises all your procurement processes in one hyper-intelligent hub
- ▶ Fully customisable set up ensures that every single transaction becomes simple, seamless and compliant
- ▶ The real-time reporting dashboard delivers crucial insights to help supercharge your business resources
- ▶ Live competitive tension results in the best supplier value for every job, every time and drives accountability

We're for insights, ROI and real savings. We're for procurement being a driving force in business. With over 3,000 users and counting, we believe the robust, specialised and award-winning ZOOOL platform is the new way of intelligent procurement.

**ZOOOL.** Unusual name. Unusually clever procurement. Since 2007.

## PROCUREMENT UNLEASHED

Old world procurement can be clunky, static, fragmented and complex. ZOOOL is the new world where clever is cool and smart is the new black... and ZOOOL is seriously smart.

It's like poetry in motion.

It's procurement in motion!

## MORE INTUITIVE

ZOOL helps to centralise and automate high volume and value transactions between buyers and suppliers. Even more importantly, this hyper-intelligent hub is easy to use and backed by a friendly, local customer support team who are eager to help out.

ZOOL covers all aspects of the supply chain, from job, contract and vendor management through to compliance and regulatory requirements and spend analysis. This mitigates risk as the buyer determines protocols and is in complete control at all times.

## MORE FLEXIBLE

ZOOL comes right out of the box and the set up is designed based on your specific business needs. The system is highly scalable and can be adopted for the management of a single category right through to a large scale international operation.

ZOOL displays much more versatility than the software giants. The modular and template driven approach allows for customisation to enhance your workflows. At a job level, ZOOL handles all specifications from standard through to intricate.

## MORE TRANSPARENT

ZOOL is powerful, because your data turned into insights is powerful. With a real-time reporting dashboard, procurement intel has never been richer and more readily available. So no more waiting for difficult to understand reports to be infrequently run.

As an independent and unbiased sourcing platform, ZOOL ticks all the boxes when it comes to compliance. Not only is the platform business grade with the highest level of security, but online workflows ensure that all the info you need is right at your fingertips.

## BETTER VALUE

ZOOL works to deliver significant and ongoing reductions in business expenses. This is based on competitive tension for every single job, every single time. So for your panels, this means the elimination of comfort buying and an increase in participation rates.

ZOOL empowers leaders and users and in turn drives even greater accountability. It makes your work life a whole lot easier. By saving time on manual work, users can redirect effort to more effectively managing the procurement process for all stakeholders.

## PROCUREMENT SORTED

You + ZOOL = a force to be reckoned with. It's not what you'd typically expect from procurement... and that's exactly why it works. This powerful tool will continue to get better and better.

Of course, saving money and time is just part of the equation. Our flexible pricing model is based on simplicity and transparency.

So if you want to do things differently and set procurement in motion, let's talk more about your specific needs and lock in a demo.
